

*Le6000* Security – Firstly, Montreal is generally a very safe city compared to almost any large city in the world.

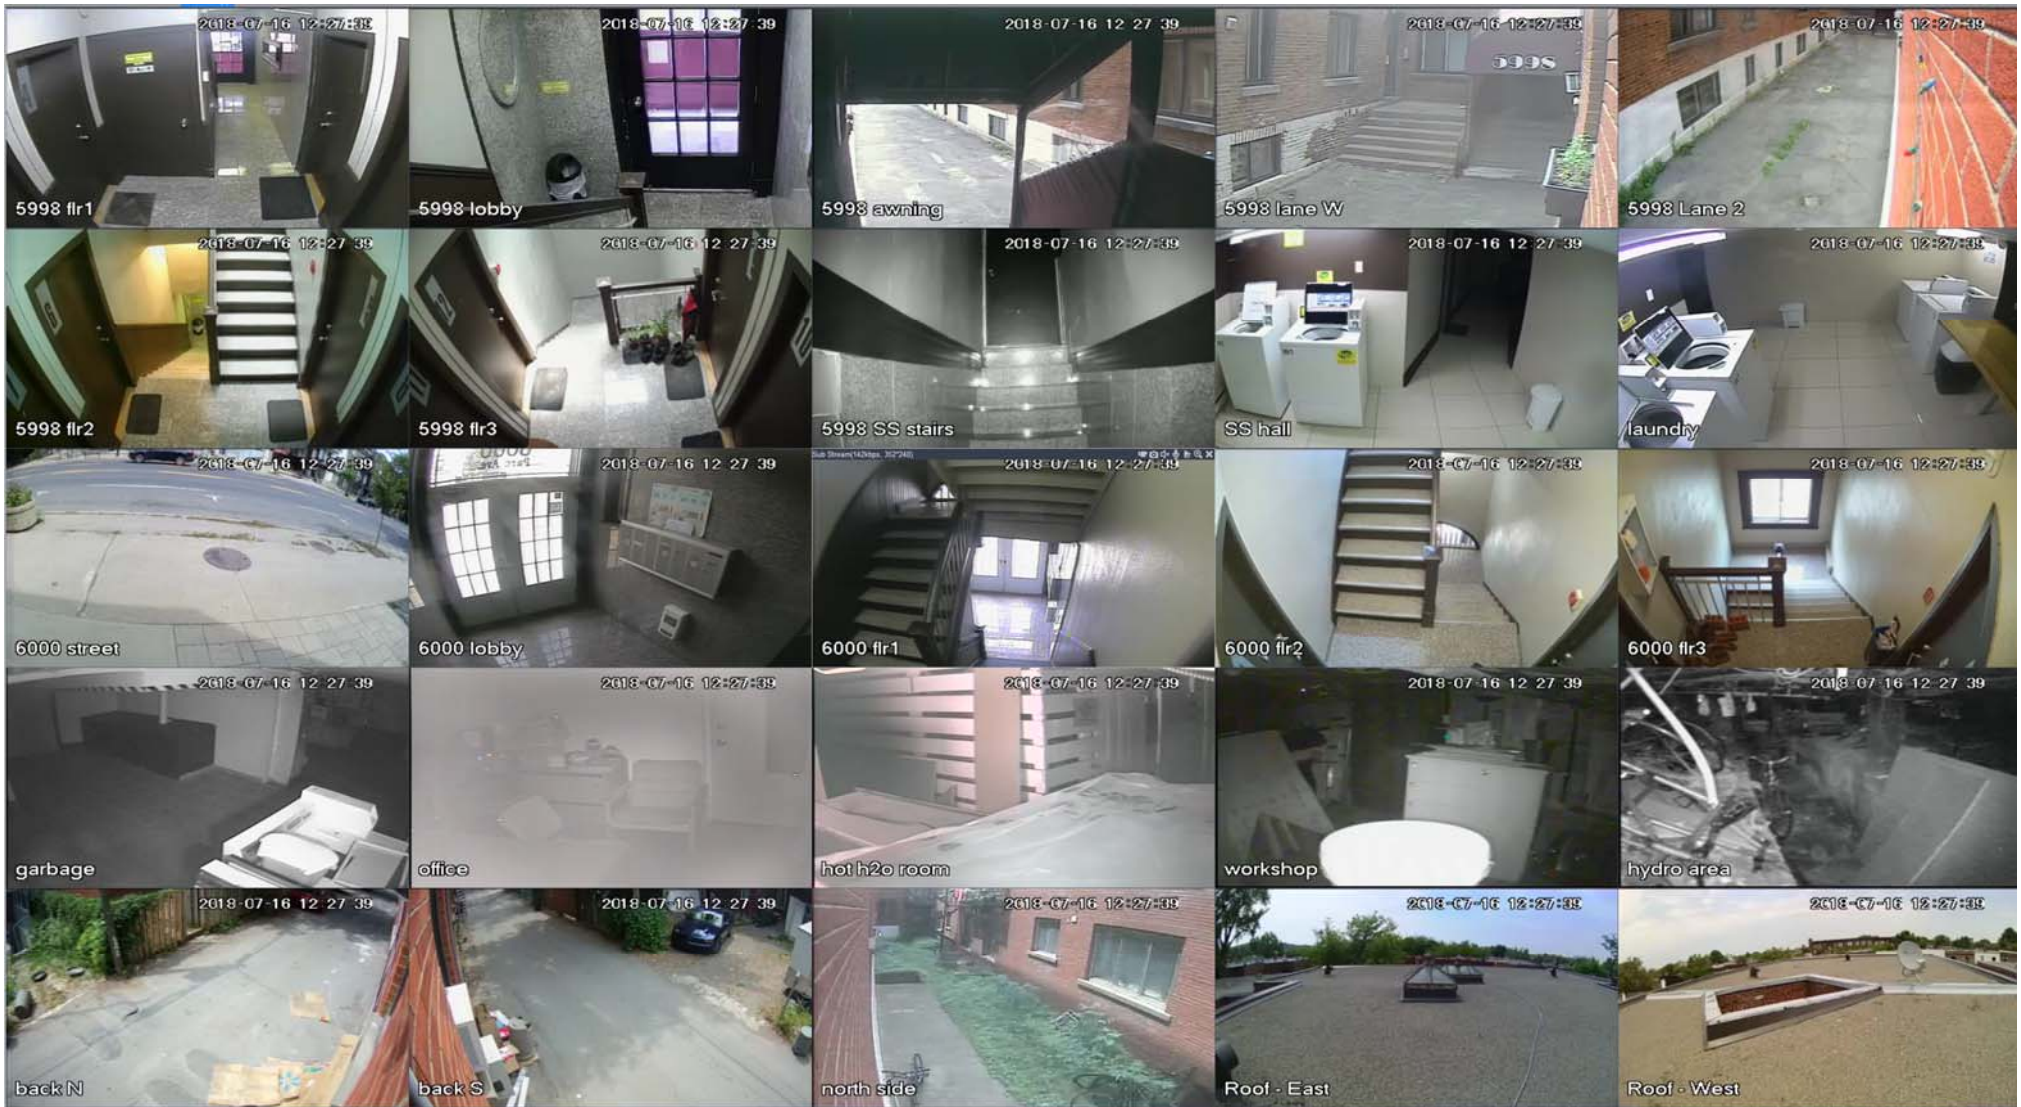

The front doors have Medico Locks, and each apt has a deadbolt. As well there is an intercom system from the front door to each apartment and a button on the intercom to “buzz open” the front door from the apt.

As well we have a full color closed circuit camera system, with 24-hour video surveillance and recording, and accessible thru the internet. We store several months of recordings.

See sample pictures below:
